I. Executive Summary

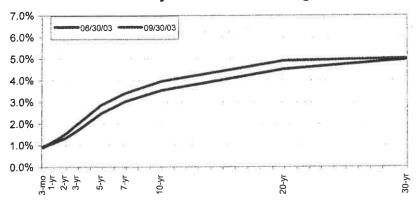

Introduction

This is the Compliance Review of the County of Fresno's Treasurer's Investment Pool Portfolio for the period ended September 30, 2003, pursuant to California Government Code 53646. The report has two primary objectives: (1) to provide information regarding portfolio holdings as to compliance with California Government Code Sections 53601 and 53635, as well as the County Treasurer's Statement of Investment Policy and (2) to detail portfolio characteristics of the portfolio's investment holdings.

Quarterly Overview of Markets:

During the quarter, the US Treasury yield curve became more convex as intermediate yields increased; primarily dampening returns for holders of intermediate term bonds. At the August 12th, 2003 meeting, the Federal Reserve left short-term rates unchanged stating that they do not intend to raise short-term rates for "a considerable period" in an effort to keep long-term rates from rising.

As indicated on the previous page, during the third quarter of 2003 mid-term yields increased while short and long-term rates remained steady. The yield on one-year Treasury Bonds increased slightly by 6 basis points to 1.15% for the quarter while the yield on thirty-year Treasury Bonds also increased slightly by 6 basis points to 5.01%. The spread between the one-year Treasury and the 30-year Treasury ended the quarter at 386 basis points unchanged from the end of last quarter. During the quarter, Certificates of Deposit experienced an increase in yield for both the 180-day maturities and 90-day maturities. Commercial Paper moved lower in the 30-day maturities, by 5 basis points, and increased by 4 basis points in the 90-day maturities to 1.05%.

Portfolio Position

The portfolio maintained a weighted maturity of slightly more than one year (369 days). The County of Fresno Investment Policy Section 11.0 recommends a portfolio of securities with a weighted average maturity not to exceed 365 days. Keeping the portfolio within this maturity range minimized its exposure to potential interest rate shifts that can occur in the mid-maturity sectors of the yield curve. The portfolio was oriented towards high quality with 59.7% of the portfolio's assets invested in risk-free instruments.

Compliance with California Government Codes 53601 & 53635:

The Investment Portfolio is compliant with the California Government Codes 53601 and 53635.

Compliance with Treasury Investment Pool Statement of Investment Policy:

The Statement of Investment Policy is more stringent than the California Government Code. As of 09/30/03, the Treasurer's Investment Pool portfolio complied with its Statement of Investment Policy.

Please refer to the next section of the report for a more detailed evaluation of the portfolio in relationship to the California Government Code and the Treasurer's Investment Pool Statement of Investment Policy.

Portfolio characteristics

The Treasury Pool's portfolio characteristics are indicative of a plan exhibiting a high degree of quality with short-term maturities.

- As of 09/30/03, the portfolio had a market value of \$1.6 billion with an average dollarweighted quality between "AA+" and "AAA".
- Approximately 59.7% of the portfolio's assets are invested in securities with virtually no credit risk (i.e., US Treasuries, US Agencies, and cash).
- The dollar weighted average life of the pool is 369 days¹.
- 40.8% of the portfolio at cost matures within 30 days, 49.7% matures within 90 days, and 52.9% within 180 days (see Appendix for further details).

Based on its relative high quality and near-term liquidity, and assuming no significant changes to pool funding policies, the Treasury Investment Pool is well positioned to meet its expenditure requirements over the next six months.

^{1.} Per the Fresno County Treasurer's Office, policy changes are in affect for 4Q 2003 to allow the weighted average maturity to extend to 547 days.

Fidelity: updated 04/17/03; prospectus 02/28/03

Fidelity performs daily mark-to-market of the holdings in the Fidelity Institutional Money Market Fund: Government Portfolio using IDC as its primary source. In addition, Fidelity manages the Portfolio in strict compliance with the rules and guidelines of Rule 2a-7 of the Investment Company Act of 1940 which governs the credit quality, maturity, and oversight of all registered money market funds.

Morgan Stanley Dean Witter: repurchase agreements are custodied by Bank of New York, which verifies the collateral valuation; prospectus 10/25/03

UBS Finanical Services: repurchase agreements are custodied by JP Morgan Chase Manhattan Bank, which verifies the collateral valuation

BlackRock Provident Institutional T Fund: updated 3/25/03; prospectus 4/18/03

To determine T-Fund's net asset value per share, the daily valuation of portfolio securities is performed in accordance with BIMC's matrix pricing policy.

BIMC uses a matrix pricing methodology that is based on pricing tiers called matrix codes, and time cells that extend out the yield curve.

The matrix codes represent how a security trades relative to other securities of the same type. Security prices (yields) represent the bid side of the market and are indicative of where we would expect to be able to sell that security.

Prices of repurchase agreements come from Bloomberg. BlackRock also checks the data against Broker/Dealers who are major participants in specific money market areas. Meuller provides prices from Treasury bills, notes, and bonds.

Portfolio valuations are performed daily. Portfolio managers who are members of the matrix pricing team check data for accuracy. This data feeds the fund accounting system that determines the fund's net asset value per share. The variance to a \$1.00/share is noted and reported to the portfolio manager daily.

pepending on market conditions, the number of matrix codes and the spread between tiers may change. BlackRock reviews these factors periodically and change them as conditions warrant.

SUBJECT: Consideration to Donate Surplus Hay Equipment to El Capitan High School

EXHIBIT: None

Background:

Approximately ten years ago, Reedley College's Agriculture and Natural Resources Department farmed over 100 acres of oat and alfalfa hay on District farm property. Since that time, most of this acreage has been converted to tree fruit. Reedley College continues to farm less than 10 acres of hay as a teaching demonstration block for plant science students. Among the main reasons for making a switch in production from hay to tree fruit was the high cost to maintain and upgrade the hay equipment used to farm the 100+ acres. The Ag Program at Reedley College currently has both a 1970's self-propelled swather and a hay wagon. As part of a Mechanized Agriculture Grant, Reedley College will be replacing this large self-propelled swather with an appropriate sized PTO-driven swather. The hay wagon has not been used in more than ten years and will not be replaced due to the small number of acres in production.

The administration is recommending that these obsolete items be donated to El Capitan High School in Lakeside, California. This equipment could be reconditioned and used for their unique Supervised Agricultural Experience (SAE) project, which annually farms 600 acres of student projects in hay production. El Capitan High School has enrolled a number of students in Reedley's Ag Program and this donation of equipment would strengthen Reedley College's relationship with the high school. El Capitan High School has agreed to pay for transportation of the equipment to their facility at no cost to Reedley College or the District.

Authority for this process is granted through Education Code section 81450.5 which allows a community college district to donate any personal property belonging to the district if: a) the property is not required for school purposes and should be disposed of for purposes of replacement; b) the property is donated to a school district that had an opportunity to examine the property; and c) the receipt of the property would not be inconsistent with any technology plan of the recipient district.

Recommendation:

It is recommended that the Board of Trustees authorize disposal of District Surplus Hay Equipment, located at Reedley College, via donation to El Capitan High School in Lakeside, California, in accordance with applicable codes and policy.
